**What's New in the Advanced File Backup?**

Let the software do it for you! Automatic Backup is a complete solution for

automatic backup software of the folders on the local hard disk, accessible via network (local area network, LAN) or Internet, as well as backup the contents of removable media (CD, DVD, USB flash disks, MP3 players etc.) A unique automatic backup system that makes it possible to take a backup of the computer with all the files and folders, even the files located in other drives, flash memory and USB devices without installing any software. With the automatic

backup system, you can take a backup of your entire computer system and restore the data to a new computer, without having to install the software. It's as simple as that. A single click of the mouse and your data will be safely back up. The unique system of automatic backup of all the folders and contents of files on the hard disk, removable devices, networks and Internet (Internet, FTP, WebDAV, CIFS, MSSQL, MySQL, Oracle, PostgreSQL, LDAP, Windows

network services, NFS and many more). Backup to several media: You can save the backup file on the local hard disk, a network drive or FTP server. In addition, the backup file can be saved on a removable flash drive, external USB hard disk or CD/DVD. Backup of all the folders and contents of files in the hard disk, removable devices, networks and Internet (Internet, FTP, WebDAV, CIFS, MSSQL, MySQL, Oracle, PostgreSQL, LDAP, Windows

network services, NFS and many more) Automatic backup of data saved on the local hard disk and removable flash drives (USB and SD) and the ability to save the backup file to a specific location The backup can be saved on several locations (local hard disk, network drive and FTP server), and also on removable flash drives, USB and CD/DVD An intuitive interface that allows you to take a backup without having to use any commands on the command

line (CLI) Get a one click backup of any Windows computer system with no special software needed A self-consistent system of automatic backup, allows you to take full backups and selective backups, since it does not need to know exactly what is stored in a specific folder Simplicity: There is no need to know what you are going to save, since it is not aware of the application that saves the files. You just need to select the folders that you wish to backup. You can

backup only the ones that you are interested in. Compatibility with most of the drives, systems and operating systems Backup files of any size Backup of different types: You can perform a full backup, which copies the entire system (registry and files), and selective backups, which can be used to retrieve only the files that you are interested in

STANDALONE: Minimum 1 GB RAM (should be a lot more) Minimum 512 MB VRAM Minimum 4 GB Hard Drive Sound Card WITH ADVANCED TESTS: Minimum 4 GB RAM (should be a lot more) Minimum 768 MB VRAM Minimum 10 GB Hard Drive Recommended: NVIDIA GeForce GTX 970 or AMD R9 290 or better ASUS Maximus VIII Gene Intel Core i7-4790 (or AMD equivalent) Minimum
